

**Venue:** Hall 5.1 5.2 6.1 6.2, National Exhibition and Convention Center, Shanghai, China

**Date:** 20 – 22 August 2025

## Various categories

### Textile technology: Nakanihon-Juki Co Ltd 6.1H A36

The company supports global apparel manufacturers expanding into China with complete sewing technology solutions. Its on-site experts provide technical support, factory planning, and equipment procurement – offering both Japanese imports and China-made Japanese brand machines (JUKI, Pegasus, Yamato). With proven experience establishing Chinese sewing factories, they deliver end-to-end services from design to installation.

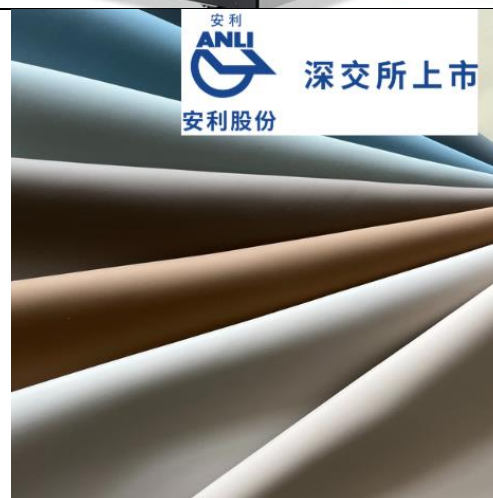

### Textile technology: Suzhou Transparent Technology Co Ltd 6.1H B56

Suzhou pioneers automated "four-edge sewing" technology for home textiles, offering innovative solutions across multiple product lines including cleaning supplies, bedding, medical textiles, and smart apparel manufacturing. The company's fully automated production ensures standardised quality while reducing fabric waste and operational costs.

### Leather: Anhui Anli Material Technology Co Ltd 5.2H H22

A leader in eco-friendly PU synthetic leather, it has been ranked #1 in China's plastics industry for 8 years. Its sustainable solutions include water-based, bio-based and 100% recycled materials – free from harmful chemicals while maintaining superior performance.

**Venue:** Hall 5.1 5.2 6.1 6.2, National Exhibition and Convention Center, Shanghai, China

**Date:** 20 – 22 August 2025

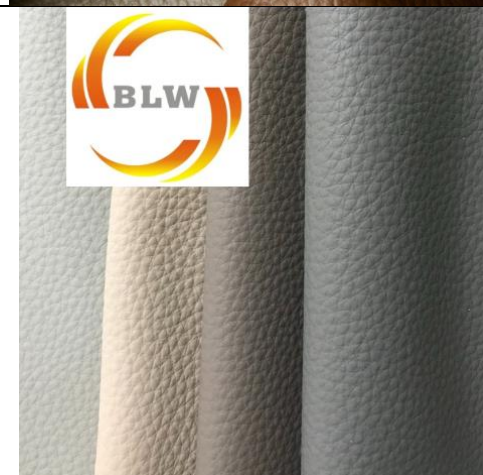

**Leather: Anhui Yongle New Material Technology Co Ltd 5.2H F29**

The company operates China's largest production base with 10 water-based polymer composite lines and 6 solvent-free eco-friendly lines. Specialising in premium synthetic leathers including ultra-fine fibre, eco-leather, genuine bovine laminated leather, and PVC artificial leather.

**Leather: BLW Manufacture International Co Ltd 6.1H A72**

For 20+ years, BLW has delivered high-quality PU synthetic leather globally across fashion, automotive, and healthcare industries. Its certified facilities produce customised, sustainable solutions – including innovative vegan leathers from bamboo and fruit fibers – meeting strict international standards. They combine advanced technology with eco-conscious innovation for premium, compliant materials.
